

## **Environment Policy**

### **Microprecision strives to minimize the influence on the environment by:**

Reducing the discharge from transports through effective planning and using of environment friendly alternatives. Environmental considerations should be a factor affecting the choice of supplier.

We shall work with economizing of nature resources and try to use environment friendly energy as much as possible.

Manage our waste in a safe and responsible manner to reduce environment influence and avoid discharge to the environment. Work with separate at source with waste and recycle.

We shall work with personal responsibility of coworkers through education, information and through active participation in the environment work.

We shall work with continuous improvement in the work environment and fulfill the legal requirements by keeping ourselves updated on current environmental laws, customer requirements and other appropriate requirements.
