

Environment policy

Microprecision strives to minimize environmental impact by:

- Reducing emissions from transport through efficient planning of our transports.
- Selection of suppliers shall be influenced on environment aspects.
- Minimizing internal defects and customer complaints.
- Working with housekeeping of natural resources and renewable energy as far as possible.
- Sourcing and recycling of waste.
- Internal purification of waste water from our main process.
- Developing personal responsibility and competence through information and encouraging active participation in environmental work.
- Working actively with continuous improvements and subscription of legislation news and letters. Fulfilling all legal, customer and other applicable requirements.

Continuous improvement:

Through continuous improvements we shall develop our product quality, processes and routines and thereby minimizing our environmental impact. This is ensured through measurement and evaluation of our Efficiency and Scrap performance.
