

Working environment policy

Microprecision AB ambition is to create a physically, mentally, socially healthy and developing workplace for our employees. In our organization we reject from all types of insulting treatment and discrimination. We focus our work on systematic prevention through risk analyzes, safety audits and workplace surveys and rely on the participation and continuous competence development from all our employees.

Our working environment shall meet the requirements set by authorities, other external actors and according to internal procedures in our management system.

Continuous improvement:

Through continuous improvements we shall develop our product quality, processes and routines and thereby creating a healthy workplace. This is ensured through measurement and evaluation of our Green Cross and 5S performance
