

Environment policy

Microprecision strives to minimize environmental impact by:

- Reducing emissions from transport through efficient planning of our transports.
- Selection of suppliers shall be influenced on environment aspects.
- Minimizing internal defects and customer complaints.
- Working with housekeeping of natural resources and renewable energy as far as possible.
- Sourcing and recycling of waste.
- Internal purification of waste water from our main process.
- Developing personal responsibility and competence through information and encouraging active participation in environmental work.
- Working actively with continuous improvements and subscription of legislation news and letters. Fulfilling all legal, customer and other applicable requirements.
