

Quality Policy

Microprecision AB was founded in 1975 and is a system supplier in advanced metal machining that takes responsibility for the entire manufacturing process from prototype to series production.

We have well developed and standardized methods for manufacturing, final assembly, final control and storage of products at all our facilities.

Our customers and our employees depend on our ability to maintain the performance of our processes (products) and services and if necessary also improving them.

The purpose of this policy is to ensure that our customers and employees needs and expectations are met.

This is achieved by continuously improving our working methods and thereby creating highest possible customer satisfaction and an attractive workplace for our employees.

Zero defects thinking and our quality is achieved through:

- Taking responsibility for our customer's requirements and wishes.
- Relying on the responsibility and commitment from all employees.
- A functional quality management system
- Continuous competence development of all employees.

Continuous improvement:

Through continuous improvements we shall develop our product quality, our processes and routines and thereby strengthening our competitiveness.
